Fund objective

The Solidum Cat Bond Fund is an open-end fund registered in Liechtenstein as a UCITS pursuant to Liechtenstein law in the legal form of a trust (UCITS V). The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of catastrophe bonds or notes and other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment.

In addition to its functional currency USD, the Fund offers CHF and EUR share classes. The equity capital of the CHF and EUR share classes is hedged to reduce effects of FX effects.

Manager comment

The fund achieved another positive result of 0.43% to 0.78% in the three currency classes in the reporting month.

The 2025 Atlantic hurricane season began on June 1 and officially ended on November 30. The season was notable for several reasons: (i) for the first time in a decade, no hurricane made landfall on the American mainland; (ii) no hurricanes formed in the tropical Atlantic from mid-August to mid-September; (iii) despite this, the season saw four storms in the two highest categories; and (iv) Hurricane Melissa, one of the strongest storms observed, hit the Caribbean island of Jamaica. As a Category 5 storm with wind speeds of 295 km/h and a central pressure of 892 mbar, Melissa is the strongest storm to hit the island since records began in 1850.

The 2025 hurricane season recorded a total of 13 storms and an ACE index value of 132.6. With these figures, 2025 represents an average year, and both values are close to the climatological norm of the last 30 years. Accumulated Cyclone Energy (ACE) is a measure of the total kinetic energy released by all storms in a hurricane season.
