

## Fund objective

The Solidum Cat Bond Fund is an open-end fund registered in Liechtenstein as a UCITS pursuant to Liechtenstein law in the legal form of a trust (UCITS V). The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of catastrophe bonds or notes and other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment.

In addition to its functional currency USD, the Fund offers CHF and EUR share classes. The equity capital of the CHF and EUR share classes is hedged to reduce effects of FX effects.

### Manager comment

February was uneventful for the Solidum Cat Bond Fund.

The conflict in the Middle East that became acute at the end of February has had no significant impact on the Cat bond market: The asset class generally benefits from its intrinsic independence from geopolitical and macroeconomic stress factors. We expect slightly higher price volatility in the secondary market indications in the medium term and possibly an increase in the base interest rate in US dollars if energy prices remain at high levels.

Although specific segments of the insurance industry such as transportation (air and marine) and energy may be affected by the conflict, the cat bond market is not exposed, as those insurance sectors have not been covered in cat bonds so far. We see an indirect influence at most in peripheral areas such as cyber and terrorism, which have also come to the market in traded form in recent years. Solidum's portfolios exclude cyber and are only very remotely exposed to terrorism.

Overall, the investment class of Cat Bonds provides excellent protection against geopolitical events and once again proves its stabilizing character in any portfolio construction.
